Kent Coast Rocked By Big Blasts

A SOUTHEAST COAST TOWN IN ENGLAND, June 18.—(CP)—Royal Air Force bombers carrying what residents of this area have come to know as "big bangs" started to roar over the Strait of Dover this afternoon for renewed punishment of invasion coast bases.

When bombs triggered the explosions, the roar of the blast was heard across the Channel with a sickening effect and small houses on the English cliffs were shaken and partially lifted from their foundations.

As each bomber wave passed over, it was followed by vapor trails evidence of guarding fighters flying high above them.

One attack appeared to veer off to the south, while others were watched by what appeared to be salvos of anti-aircraft fire.

After a lull, a second attack group went over for an assault which lasted an hour and a half.

Afterward, anti-aircraft gunners by what appeared to be salvos of bombs on French soil across the Strait.

EDWARD W. BEATTIE JR., LONDON, June 18.—(CP)—British forces bombed the German Rhine-Ruhr industrial area, centre.

Artillery Roar Heard In Damascus As Troops Continue Syria Drive

LONDON, June 18.—(CP)—Reuters News Agency reported from Jerusalem today said it was reported authoritatively that the Allied forces had recaptured Kunetra, town southwest of Damascus which fell yesterday to Vichy counter-attack.

DAMASCUS, Syria, June 18.—(AP)—The roar of artillery was heard in ancient Damascus this morning as the Allies resumed their efforts to capture the city.

CAIRO, Egypt, June 18.—(AP)—British and Free French forces in Syria are making further headway south of Damascus and are now within 20 miles of Beirut in spite of strong opposition of the Vichy troops, the Middle East command announced today.

LONDON, June 18.—(CP)—Counter-attacking Vichy forces have recaptured the Syrian towns of Mardjayoun and Kunetra, south of Damascus, British sources acknowledged today, but they declared the advance had been halted and that the situation was well in hand.

They said the French drive also had resulted in recapture of Eras, but said British and Free French troops had re-taken the town, leaving 150 prisoners in their hands.

Other Allied forces were reported concentrated around Mardjayoun and one column was said to be attacking Mezze, three miles west of Kunetra. British and Free French forces were reported maintaining strong pressure on the Kuneitra front.

At the same time, British sources said, an Allied column striking up the Lebanon coast advanced four miles west of Al-Bireh and captured another six miles without opposition, reaching a point 12 miles from the sea.

The French drive through Mardjayoun, Kuneitra and Eras was said to have been carried out by British and Free French forces under command of General Frere, son of General Frere, who had been appointed commander-in-chief of the Middle East command.

Reported that preparations are being made on the E. R. Rail at High River, Alberta, have been confirmed in unimpeachable sources here that the Duke of Windsor has accepted an invitation to visit his Alberta home this summer.

According to R.C.M.P. headquarters in Edmonton, the accident occurred at the junction of the Alberta Highway 1 and the Bow River highway.

Two men were killed. One was the driver of the car, and one other person, whose name has not yet been ascertained, escaped with a slight cut.

These two were also from St. Albert.

According to R.C.M.P. headquarters in Edmonton, the accident occurred at the junction of the Alberta Highway 1 and the Bow River highway.

HURTELS INTO DITCH

The car is said to have ruptured into the ditch, having been driven over three times after striking and snapping off a telephone pole. The driver apparently was unable to make the turn.

Courchaine died in the office of Dr. R. E. Depress, 1000 10th Street, some distance from where he was in a car.

Delorme, who is suffering from severe head and body injuries, was brought from Stony Plain by Ed.

Moving On DAMASCUS

By LYLE C. WILSON, Washington Bureau Chief

WASHINGTON, June 18.—(CP)—A U.S.-led coalition of 12 nations has signed a pact with the United States against Germany, charging violation of a U.S.-German neutrality agreement.

The German note was delivered to the state department by Hans Welles today, press conference that the note was delivered to the German embassy.

Undersecretary of State Sumner Welles told a press conference that the note was delivered to the German embassy.

He indicated that it did not touch upon present difficulties between Britain and Germany.

He said that it was to be submitted to the United Nations.

The prime minister's advisers and Mr. King himself are said to be in full agreement on the note.

Mr. King has been asked to return to Canada to discuss the note with the Canadian government.

Some observers interpreted

Dominion, U.S. To Co-Operate On Resources

OTTAWA, June 18.—(CP)—Canada and the United States have established joint committees to inquire "to explore the possibility of co-operation in the economic co-operation" between the two countries, the prime minister's office announced Tuesday night.

"This joint inquiry marks our first step in the implementation of the policy of co-operation by Prime Minister Roosevelt and Prime Minister Mackenzie King at Hyde Park on April 20," the announcement said.

The committees will be known as the joint war resource committees.

POST-WAR DILIGATION

"The committees have been instructed," the announcement said, "to study and to report to their respective governments on the possibility of (1) effecting a more economic, more efficient and more economical utilization of the combined resources of the two countries in the production of defense requirements; (2) to the extent that this is possible, making available (2) reducing the probable post-war economic dislocation consequent upon the change which the economy in each country is presented undergoing."

The Canadian committee will comprise R. A. Henry, professor W. A. Macintosh, J. G. Purdy and Alex Skelton, L. K. Kerfoot, and the American committee of external affairs will sit with the committee "as occasion may require."

United States members of the committee will be William L. Batt, already a member of the Canadian delegation, and a representative of the finance department, Harry D. White, Professor Alvin H. Hansen and E. Dan Jurand.

OTHERS TO SIT

A. A. McLean, an assistant secretary of state, also will sit with the committee from time to time.

The announcement added that Leroy J. Silbester has been appointed liaison officer for the department of external affairs to be appointed shortly; the statement from the prime minister's office said.

"A liaison officer from the department of external affairs will also be appointed shortly," the statement from the prime minister's office said.

Last night the Canadian government was asked whether formation of the committees would affect the duties allotted the military committee board of war recently created by Canada and the air force.

(On May 2 Munitions Minister Howie announced formation of the committee "to collect and exchange information on munitions production in the United States and Canada in order that all sources in each country may know to whom resources should be given.")

Among members of the Canadian committee, Mr. Henry and Mr. Bouchard are on the staff of the munitions department, while Mr. Purdy, of the finance department, and Mr. Skelton is in the research department of the Bank of Canada.

86 Per Cent. Of British People Favor Churchill

LONDON, June 18.—(CP)—Eighty-six per cent of the British public approve of Winston Churchill's handling of the situation, a poll by the British Institute of Public Opinion, published today by the New York Times.

Nine per cent disapproved and five per cent were non-committal. Fifty-eight per cent said they were satisfied with the way Britain's conduct of the war, 39 per cent were dissatisfied, and 12 did not know.

The poll was taken immediately after the Commons debate on Crete.

Today's War Moves

Continued from Page One
miles forward and relieve the British garrison at Tobruk, besieged there for months.

From Tobruk, he could command the Axis supply lines inland, well back within Libya. If he could consolidate there and keep command of his forces of infantry, tanks and aircraft, Benghasi and Tripoli would be in order, he said.

The British had in the meantime been driven to the north, almost more than a hundred miles, bear especially when enclosed in a stifling heat.

TO BE SUPPLIED

The British advance over every great distance is out of the question. Moreover, an army must be supplied, which means the maintenance of communications over a long and difficult haul.

For the present, Gen. Wavell will have to do something of a mix-up to get his men to Tobruk.

The British command from Cairo announced yesterday that the campaign, the British had withdrawn to their previous forward positions, and were pushing forward into the unknown.

He went on:

NEAR MAY STATEMENT

That may mean a stalemate, but it may also mean to conclude a force for a new attack. Even Gen. Wavell expresses no definite optimism, however, in his near May statement being: "It may be that no decision or result will be reached by us in the next few days."

Gen. Wavell and Gen. Clark claim complete victory and state that the offensive has been smashed.

If we go forward, the situation becomes difficult for the Allies. It is not clear what the defense of Egypt will be.

Both sides will bring up reinforcements, the British, perhaps, fighting to the last.

ILLUSTRATES STORY

Lord Beaverbrook then used to illustrate his appeal the story of "King Arthur and the Golden Crock." The Golden Crock is the old British legend in which the golden cock, brought to the camp by King Arthur, brought victory and death to the British.

The King and Lord Beaverbrook sing in the opera when he hears the cock crow: "If that cock should be in error, we will lead a life of terror."

But our golden cock, the radio, is never in error, so we will lead a life of terror."

Enter this service, join this venture, you will have opportunity to bring to all of us the day of peace and victory."

Continued from Page One
British's remark as indicating that in this way the officers could not be reassigned directly to other units.

Welles indicated that the concular officials would not be permitted to take any unusual amount of frozen meat, but the concular officials were then given the leave to the United States. He said that President Roosevelt was controlling the funds is still inclusive.

Welles declined to say whether the German protest indicated any particular action.

MAY PREVENT EXODUS TO THE AMERICAS

WASHINGTON, June 18.—(UPI)—Orders closing the United States borders to exit of German nationals aroused speculation today whether the United States would be able to prevent or control an exodus of Nazi propagandists to South America.

With the British fleet substantially in control of the sea it might be considerably easier for some of the exiles to escape.

On this June 18, despite intensive efforts of the British to intercept and destroy air attack such as no other nation has ever known, Britain is on the offensive rather than defensive.

Its naval blockade, its economic strangle on Russia, and Germany that could help her avoid diverting to South America any Germans who might become active propagandists there.

BRITAIN STILL STANDS

Yet 15 months later Britain still stands. Her world-girdling frontiers of Empire are unbroken, her ports are safe, her lines of communication are unbroken, and her means both of defence and of attack are vastly improved a year ago and steadily increasing.

On June 18, despite intensive efforts of the British to intercept and destroy air attack such as no other nation has ever known, Britain is on the offensive rather than defensive.

Its naval blockade, its economic strangle on Russia, and Germany that could help her avoid diverting to South America any Germans who might become active propagandists there.

MOSSOW RUSSIAN RIDDLE

Implicit in the Russian-German crisis, featured by vast armies racing across the continent, is the possibility that Hitler will seek greater stocks of food, oil, vital war materials and armaments in Russia.

Many informed observers servers read that answer to the Moscow-Berlin riddle.

The most important factor of the crisis, it means that Germany has accepted the probability of a second world war, even if Hitler's predecessor, it is to be expected, is preparing for some tremendous strike against Britain either in the east or against Britain itself.

It would get only nine-fifths as much light as the sun gives, even the entire sky above the horizon shone as brightly as the full moon.

Britain Wants Radio Men For New Invention

Continued from Page One

RENNINGEN, June 18.—(AP)—The British minister of supply yesterday issued a "call to serve" to radio experts in Britain and America to appear in a broadcast for volunteers to "bring your insight and your vision to the battle for the future of the world."

Asked specifically for men to work on the new invention, which apparently is a secret project, the minister said: "We are not in a position to tell you what the invention is, but it is the most extensive of the war."

Asking specifically for men to work on the new invention, which apparently is a secret project, the minister said: "We are not in a position to tell you what the invention is, but it is the most extensive of the war."

Dr. W. G. Carpenter, director of technical education for Alberta, who has been relieved of his additional post as principal of the provincial Institute of Technology and Art, Calgary, has accepted his former position at his own request, due to pressure of work in the other branch of the service. He is being succeeded by James Fowler, M.A., B.Sc.

Leaves Post Invasion Bases In Day Attack

Continued from Page One

ing to Cologne and Dusseldorf, and the French to Paris, and the British to London, with whose security on charges of conspiracy was postponed today until awaiting the outcome of the trial.

The orders of planes started bombing railroad yards, storage depots, docks and warehouses over Germany and Germany.

Early reports indicated that the night's operations may have been the most extensive of the war.

PLANE ATTACK

The British had been awaiting, took part in an attack on the French invasion coast yesterday until dawn today.

At least 13 German Messerschmitts and 10 British planes were lost in the coast road.

Thousands of men, women and children, unable to sleep because of the terrific explosions of bombs on the French side of the channel, more than 25 miles away, fled to the hills of Kent, Dorset, Hampshire, and Wiltshire and listen.

The British coast shook all night, and extended to the entire coast line between Dunkirk and Boulogne, and penetrated deep inland.

It was the continuous pest of bombs that the British are trying to stop.

The British are trying to stop the art of reconciling unity and diversity through the alchemy of spirit.

Today, English people are displaying a spirit which is inspired in all of us a great sense of the dignity of the human spirit . . .

IMPRA PRODUCTION

Britain was growing now that Britain's air force is woefully weak at the start of the war and for many months afterward, was able to impinge Germany's war production in the Rhine-Ruhr area, by constant bombing.

An indication of the scale of the British war effort was shown last night when great formations of bombers escorting fighters flew over France, pierced the Nazi fighter screens, and hurled tons of bombs on invasion coast objectives.

British was growing now that Britain's air force is woefully weak at the start of the war and for many months afterward, was able to impinge Germany's war production in the Rhine-Ruhr area, by constant bombing.

An indication of the scale of the British war effort was shown last night when great formations of bombers escorting fighters flew over France, pierced the Nazi fighter screens, and hurled tons of bombs on invasion coast objectives.

R.A.F. Pounds Invasion Bases In Day Attack

Continued from Page One

ing to Cologne and Dusseldorf, and the French to Paris, and the British to London, with whose security on charges of conspiracy was postponed today until awaiting the outcome of the trial.

The orders of planes started bombing railroad yards, storage depots, docks and warehouses over Germany and Germany.

Early reports indicated that the night's operations may have been the most extensive of the war.

200 PLANE ATTACK

The British had been awaiting, took part in an attack on the French invasion coast yesterday until dawn today.

At least 13 German Messerschmitts and 10 British planes were lost in the coast road.

Thousands of men, women and children, unable to sleep because of the terrific explosions of bombs on the French side of the channel, more than 25 miles away, fled to the hills of Kent, Dorset, Hampshire, and Wiltshire and listen.

The British coast shrank all night, and extended to the entire coast line between Dunkirk and Boulogne.

It was the continuous pest of bombs that the British are trying to stop.

The British are trying to stop the art of reconciling unity and diversity through the alchemy of spirit.

Today, English people are displaying a spirit which is inspired in all of us a great sense of the dignity of the human spirit . . .

THESE ARE THE GREATEST MOMENTS IN HUMAN HISTORY

It is the greatest moment in history.

It is

Edmonton Bulletin

Founded in 1865 by Hon. Frank Oliver
Published every afternoon except Sunday
by the Alberta Free Press Limited, at the
Bulletin Building, 9841 Jasper Avenue,
Edmonton, Alberta, Canada.

Shift The Clocks?

If Edmonton and other Alberta
cities are to adopt daylight saving
time, they will do it in view of
the fact that the Dominion will not
force the rule upon them. This is the
word from Ottawa.

The proposal originated in a desire
to give the reserve military units long
periods of time in which to train, and
that these units are working during the
days and must do their training in the
evening. The evenings are long now,
but are due to start getting shorter in
a few days. In a couple of months
darkness will come earlier, and the
city councils see fit to adopt
the first time, the public generally will
not agree, without any doubt. But it would
surely be desirable, even necessary, for
the councils to find out if they
have the power to enforce the
1938 act, which forbids anyone to refuse
to abide by the decision. There would
be that little advantage, and a great deal of
confusion, if some establishments were
run on daylight saving time and others
on standard time. Unless
councils have the power to enforce an order, it
would be doubtful wise to attempt to
make the change.

To Take Men To Jobs

It is good news that skilled tradesmen
on the prairies who are not em-
ployed in war work will be encouraged to
go to parts of the Dominion where
their services are required.

Now that the large, highly public
employment offices will be shifted from
provincial to federal control, and these
facilities will be used to induce trained
westerners to migrate to areas where
they can be employed in building ma-
chinery for our fighting forces, the
temporal loss of population thus
caused to western communities is of no
public importance compared to the
urgency of putting the skilled labor of
the country where it will come most
efficiently into war production.

Munitions factories and equipment
plants of all sorts must be manned
fully and pushed to the limit of their
capacity. So far as dependable
reps go, we are not being outdone
by the east, and it is the west that
and its opportunity also, to turn
out every plane, tank, ship and gun
of which the nation is physically capable.
How many skilled men there are in
the Prairie provinces who are not
working in war plants but who are not
employed, is not known. Many fewer
they are needed and cannot be got on
the jobs too soon.

that country will make if and when
they have the opportunity of actively
participating in the war.

The promised supplies of munitions
and all other things necessary are
going to reach "wherever" British-Al-
lied forces are holding the line for
democracy. Col. Knox said, "Col. Knox
was as positive as President Roosevelt,
whose words he quoted and emphasized.
The goods are going to be delivered
where they are needed; that "can be
done, must be done, and will be done."

Speaking as chairman of the Axis
pointed out that sea power backed by
air power can frustrate the Axis' plans
and bring about its eventual defeat.
To keep control of the seas in the hands
of the democratic allies was vital. And
"we must strive to achieve the moment
of that object." Every effort toward
the United States was being employ-
ed and would be employed to build
warships and merchant ships, to the
end that Britain could be fed and armed
with the tools for freedom and to
advantage wherever fighting has
to be done. To the same end, airplane
production was gathering momentum,
with an objective the Axis powers could
not hope to match. These things Can-
adians have known, but when heard
them repeated by Col. Knox in words
and tones which gave new meaning
to the facts.

The viewpoint of Col. Knox was
not less notable than what he said. He
spoke not as a well-known statesman
standing on the line but as the representative
of a country consciously and
resolutely involved in the struggle. The
United States is in the war in all respects
one—and in to the finish.
Solely and finally, the Allies will win.
The Allies will be with them, come what
may, until Hitlerism is smashed. That
was the point of view from which the
Secretary spoke, and the attitude he
kept throughout.

At all places in the west Edmonton
is the last line to be reached, en-
thralled by a few light shows in the
third week in June. Usually there is
no complaint hereabouts at this time of
year on the score of dryness. This
season, very evidently, is "different".

Lord Beaverbrook has come in
from Europe, and while the British
expelled troops had to fight in Europe
without air protection there were
plenty of reserve planes in Britain. The
difficulty was that the reserve planes
were fighters, while only long range
bombers could operate from bases in
Europe. The British Greeks, however,
had been shot down heavily by
German fighters, and it is
getting more of them now, as Cologne,
Dusseldorf, and the invasion
ports testify by their wrecks of debris. Beaver-
brook, whatever his faults, but first
and foremost the kind of plane needed
to protect Britain; and he seems to
have made a job of it.

Looking Backward

From the Bulletin Files

1891-50 Years Ago

Rev. M. Scott, C.M.S. minister at Fort Vermilion, lower Peace River, accompanied Thursday on his way to Winnipeg, accompanied by two of his children, whom will play golf.

It is said that more miners are at work
on the river this season than ever before.

A party of men employed by Prince Bros.
arrived at Fort Vermilion, Wednesday, to raft lumber from the mills up the river.

The enrollment of P. L. McNamara as an
admiral and navy pilot is gazetted, also the enrollment of J. V. Kildahl as navy
public.

1901-40 Years Ago

Lord Kitchener cables that Gen. Elliott's
column inflicted a severe defeat on De Wetta's
force near Reitz.

At Stettin, a party of Victoria
miners were captured when they were
surrounded by Boers.

The Shamrock 2nd had completed her
trip to England, and C. P. R. trackmen were to go on strike tomorrow over the whole system.

Mr. H. H. Califord has got his busi-
ness to an English syndicate.

1911-30 Years Ago

The new provincial asylum Ponoka is
nearing completion and will be opened early
in July.

Montreal Sheldon, Montreal's financial
genius, was sentenced to five years in the
penitentiary.

Mr. Gardner will devote his attention
exclusively to the department of agriculture.
There have been indications,
that the two departments were too
much of a load for him to carry.

It was probably a mistake that the war
services had not been created when the
war services had to be organized.

The addition of the new Minister will
strengthen the service.

Senator Nye's helpful suggestion that
a geographical factor can-

The New Minister

Canada's new Minister of national
war services is Mr. Joseph Thomson,
member of the Conservative party.
Mr. Thomson, whose parents
came from Iceland, which adds interest
to his appointment, because he thus
represents a people whose homes Canadian
tramps have been guard. For
the man, a scholar, a man of middle age and broad
experience, who should be able to
administer the department successfully
and also to enlist support among
Canadians of all classes for our war
service.

Mr. Gardner will devote his attention
exclusively to the department of
agriculture. There have been indications,
that the two departments were too
much of a load for him to carry.

It was probably a mistake that the war
services had not been created when the
war services had to be organized.

The addition of the new Minister will
strengthen the service.

Washington: After July 1st ocean-going
passenger ships will be equipped with
wireless apparatus.

London: The feature of today's session of
the Imperial conference was the proposal
that the British government be requested to open

negotiations with foreign governments having
a view to securing liberty from
treaties for any of the dominions which
have signed them, and to secure the right of
impairing the treaties with respect to the rest
of the Empire.

1921-20 Years Ago

London: Sir Hamar Greenwood stated
that 366 murders had been committed
in Ireland during the past year.

Berlin: Report of the U.S. State
Department says that 2,000 people are
dying daily from starvation.

Washington: The House voted to appropriate
\$250,000 for the relief of Spanish
refugees.

Croydon, Eng.: Captain Frank Hayes
flew in from Rome to Croydon in five hours
and 39 minutes.

Ottawa: Mr. E. W. Beatty told a committee
of the Dominion Agricultural Council that
the Dominion Agricultural Council will

give its full support to the new

Minister of Agriculture.

Berlin: Report of the U.S. State
Department says that 2,000 people are

dying daily from starvation.

Washington: The House voted to appropriate
\$250,000 for the relief of Spanish
refugees.

Croydon, Eng.: Captain Frank Hayes

flew in from Rome to Croydon in four
hours and 39 minutes.

Ottawa: Mr. E. W. Beatty told a committee
of the Dominion Agricultural Council that
the Dominion Agricultural Council will

give its full support to the new
Minister of Agriculture.

The U. S. Is In The Fray

Canada is indebted to Col. Frank
Knox, Secretary for naval affairs of
the United States, for visiting Canada
to study the progress of the Victory
Loan campaign; and perhaps even
more for a speech whose inspirational
value can hardly be overestimated. Col.
Knox spoke as a man who knows his
own mind, the policies of his Government
and the policies of the people of the
United States well enough to know
what he is doing as to the whole-hearted
support the United States will give Britain and its allies
as to the decision the people of

that country will make if and when
they have the opportunity of actively
participating in the war.

The promised supplies of munitions
and all other things necessary are
going to reach "wherever" British-Al-
lied forces are holding the line for
democracy. Col. Knox said, "Col. Knox
was as positive as President Roosevelt,
whose words he quoted and emphasized.

air power can frustrate the Axis' plans
and bring about its eventual defeat.
To keep control of the seas in the hands
of the democratic allies was vital. And
"we must strive to achieve the moment
of that object." Every effort toward

We Approach Air Parity

Luftwaffe's Dominance Is Challenged By R.A.F. As Production For Britain Grows

By HAROLD L. WEIR

There is a triple significance in the current
reports of British空中力量 raids over Germany.
First, that Britain is increasing its volume
and intensity while air raids over Germany
are becoming less frequent. Second, that
the Germans are making maximum
efficiency because of the widening
of the sector.

The second point to note is that reduced Luftwaffe
activity is probably due to the slowing
up of replacements. This has
been indicated by the successful bombing
of airplane factories and air-
fields in France and occupied France by
Harold L. Weir

The third and most vital point to be considered
is that Britain's ability to produce
airplane aircraft is undeniably approaching the
level of the German Reich.

But the British have not

forgotten that parity makes such an event not only a possibility but a probability
whenever the British strength is added to it.

Nevertheless, it must be admitted that
airplanes have proved themselves to be a
greatly superior form of offensive and
defensive defence than Britain, perhaps, was willing
to admit before the attack on France.

There is also an important evidence in this connection.

If a German submarine has without visit
and search and without providing for the
safety of the crew sunk a merchant ship
in the Atlantic, then the United States government is faced with the practical question of how
such an incident is to be met. According
to American law, the submarine must be
guaranteed security if it is to be allowed to
sink a ship. The question is whether the
American people will reach the judgment
that the submarine must be sunk if it is
decided to be an "incident" to inflame
the public. The American opinion as to
what must be done will, however, only
be the foundation for the main inquiry which
must turn, it would seem, on the following
considerations:

American people will reach the judgment
that the submarine must be sunk if it is
decided to be an "incident" to inflame
the public. The American opinion as to
what must be done will, however, only
be the foundation for the main inquiry which
must turn, it would seem, on the following
considerations:

If a German submarine has without visit
and search and without providing for the
safety of the crew sunk a merchant ship
in the Atlantic, then the United States government is faced with the practical question of how
such an incident is to be met. According
to American law, the submarine must be
guaranteed security if it is to be allowed to
sink a ship. The question is whether the
American people will reach the judgment
that the submarine must be sunk if it is
decided to be an "incident" to inflame
the public. The American opinion as to
what must be done will, however, only
be the foundation for the main inquiry which
must turn, it would seem, on the following
considerations:

Looking them Over

by JACK KELLY

LAST night's second game of the Edmonton Junior Baseball League's schedule established the Maple Leaf Athletic Club as a powerhouse unit. Their 11-0 shutout of Ducey's Cubs was achieved by punching the runners around the bases with hits—10 in seven innings. While this offensive was being put over, Pilchers Patry and Pete Danylowich held their own.

The Canadian Athletic Club won its opening game by a decisive margin over Singer's Clothiers, so the Leafs and Canadians—hitless—again are leading for first place.

However, the two teams will be meeting again in the scores of the first two games can be taken as criterion of the relative strength of the four clubs. Leafs are the only ones who had played as a unit before. Practically all of them were in the City Juvenile League last season. Coaches of the Leafs, Canadians and Singer's had to go into the opening games without having ever seen their players in a real game. Batting orders, positions, pitcher selection, etc., were largely guess work and the boys themselves were naturally jumpy.

June 23 is the deadline on which all clubs must reduce their rosters to the limit of 15 players and this will go quite a way toward balancing up the power of the teams. All clubs are agreed that every effort shall be made to balance up the league and some swapping of talent is likely in the next few days.

Uniforms were again a problem last night. Material for two complete and very smart new sets arrived from Monday after eastern wholesalers had been combed for flannel to make them up was unable to complete the job in time for last night's game.

The evening was saved from catastrophe through the generous aid of Cal Pickle's Dodgers and the Waskeskin Baseball Club. Next game is Friday evening with Singer's Clothiers at Leafs.

The League is plowing steadily ahead through a mass of difficulties.

The next week all four clubs will be setting down into what promises to be mighty interesting baseball.

The Boys Are Thumbing Rule Books

WHEN Sunday's Junior League opener was called in the last of the fifth with one man out, half the batsmen were plumb lost as to what the official score was. When rain stopped play, the Canadians were at bat with one man out, three runs already across the plate in their half of the fifth and leading the Singer Clothiers by 11-2. The Clothiers' skipper, in the first of the fifth, was before the Canadians started this incompletely last half of the fifth.

Spalding's official rules give no rule to back up this contention which is obviously unfair since such a reversion would mean that the Clothiers would be given three runs accumulated in five times at bat while the Canadians would be given only one run.

While it is true the Canadians did not run three times in the unfinished last of the fifth, they did not run three times and need them or when the game would end. They accordingly went to work with their bats and fairness demands that they be given credit for the hits and runs they had.

This rule may be covered in Section 6 of Rule 23-B of Spalding's Game, which says in respect to problem in question "If the team second at bat has scored in an unequal number of innings more runs than the team first at bat, or if the team second at bat is at bat when the game is called, and has scored in the incomplete inning the same number of runs, or at least one run more, than the team first at bat, the score shall be the total number of runs that each team has made."

This rule Sunday's situation perfectly for the Canadians were second at bat and had scored three runs in the uncompleted last half of the fifth while Singers had scored two in the first of the fifth.

2. All hits count, pitching and plays count in the Edmonton Junior League averages.

Central Loop Game Dispute Ends In Twin-Bill Order

DODGERS and Ponoka Stampeder, who are rapidly falling away behind their scheduled games in the Central Alberta Baseball League, will make up for lost time with a double-header at Ponoka on Sunday, August 3. It was decided at a meeting of the league executive last night.

Win Means Cash
PHILADELPHIA, June 17.—(UPI)—Lou Sandler's successful defense of his bantamweight title is a good omen for the Canadian Mississauga and Puerto Rican brand.

The battle-worn Baltimore bantam hammed out a 12-round decision to Frank Fure in Subie Park, Philadelphia, Monday night. As a result, Sandler is in line for heavy cash guarantees to box in the Island promotion.

J. Hodgkinson** making plans for his McCauley Concert Group.

Getting Around with JOHN OLIVER

ONE of the most popular show places with tourists—and deservedly so—is the main provincial government building. While there is a large number of tourists each day, a large percentage of those who enter the portals for about nine months of the year, are on business bent. But, in the other three months, the building is the magnificent pile of Alberta stone shaped into an administrative centre, purely for sightseeing purposes.

The tourist season is now peaking up to its peak and the steady stream of visitors is growing larger each day, increasing in size even as the sunbelt when King Edward's birthday approaches. Most National parks are open, with all their attractions in full swing and in between the semi-natural unsupervised mountain highway. These make a trip through the park through the mountains and in the inevitable stop-over, many visit the legislative centre. . . .

The first big government in any capital is an attraction. This is easy to understand. In the main building there are many fine sights. The library, the Royal Canadian Mounted Police Museum, the Legislative chamber itself, the "zoo" and tower, from which a splendid view of the city can be had for miles around.

The last big attraction is in any capital in an attraction. This is easy to understand. In the main building there are many fine sights. The library, the Royal Canadian Mounted Police Museum, the Legislative chamber itself, the "zoo" and tower, from which a splendid view of the city can be had for miles around.

Not only are the visitors drawn from other provinces, but a great many Albertans, when here for one reason or another, drop in to see the sights. Whole classes of school children come by truck from rural parts, the charge of teachers or parents, to see the exhibits and to experiment without being too costly.

This phlegmatic wall usually made a suitable screen for projecting color pictures, but the photographs themselves, to obey their exposure meters and to experiment for exposures and make note of their results.

Canada's chances were not necessarily bad, said, adding that most of the cameras "in the \$20 class" were good enough to do the job.

The party were breakfast guests of the Hudson's Bay Company, from whom a splendid view of the city can be had for miles around.

The grounds surrounding the government buildings are particularly popular spots of screen and stage work. In the picture, the author's opinion is that it is simply amazing the people of Edmonton and district Saturday and next week.

The grounds surrounding the government buildings are particularly popular spots of screen and stage work. In the picture, the author's opinion is that it is simply amazing the people of Edmonton and district Saturday and next week.

Dorothy Dix Says:

The reason why many mothers-in-law and daughters-in-law fight like cats and dogs is that the man who married her son is not the man she wanted him to marry. She wants a strong man, and one of each other's strengths.

The unknown and **the different** in femininity seem to have a special allure for men, so if Mother is pretentious, her son is more likely to fall in love with a skinny flapper. If Mother is a prude, he will be attracted to her two flat feet, planted firmly on the solid ground, he picks out a wife who is a **“weird”** porcine matron, dressed in a faded, ill-fitting dress.

On the contrary, if Mother is eccentric and temperamental, he chooses a wife who is a **“weird”** matron, not a single girl who yearns to please about her person.

And then, having brought together these two women who haven't a taste nor a habit nor an interest in their new husbands, he thrusts upon them each other's ambitions to love each other and get along with each other.

Naturally, they don't. Irrespective of the jealousy the situation engenders, the two women will love the same man, and who both have claims upon him; there is the antagonism of opposites.

But, you say, there is nothing in all this that any man does deliberately and selects a wife as unlike his mother as possible. After he marries her he expects her to be a good mother. He figures out that this miracle is to be worked and this transformation is to be accomplished goodness only knows.

Of course, there is a bittersweet when the poor doors discover that when they married women who were not like their mothers they stayed that way, and this dis-

A Knitted Blouse For All-Year Wear

PATTERN 6805

It's news for knitters looking for something unusual in a simple-to-knit blouse. Almost entirely of garter stitch, this is so quick and easy for a beginner to make. Novelty buttons add to its glamour.

Alice Brooks Pattern 6805 gives directions for a blouse in size 16-18.

To obtain this pattern send 20 cents in coins to Household Arts Dept., The Edmonton Bulletin, 60 Front Street West, Toronto, Ont. Be sure to write plainly your name, address, and pattern number.

Please allow a week or ten days for delivery.

pointment makes many a man jump to his wife.

He makes blind to her good looks, and she is a real brand of virtues in which he is accustomed. It makes him hard on his wife's faults because they are human shortcomings to which he is not accustomed. His wife is the only one of those others who advertise his success, and that booms his stock for her to make no better foundation than that Mother didn't do things that way.

DOROTHY DIX.

The Man I Want

By Rob Eden

MARY ALLISON is left waiting at the mine entrance by her husband, **BARRY FLYNN**, Nevada mine owner. Mary has received news from home that her son, **LETA GILBERT**, who she once was in love with, has returned to town to escape embitterment.

When parents leave town to escape embitterment, they usually leave Harry, whom she still loves. His valiant efforts to win back his wife, **MARY**, when she runs away with **GILBERT**, who is full of anger and spite, are not enough to make her return. She has refused to share a car to **Mulhall** because he is a "softie." When her break down and **Gilbert** overtake her, she rides with him. But **Mary** is not having things her own way. She is a miner and wants to be a miner and lands a job at the mine.

CHAPTER EIGHT

DIMLY illuminated by lights at each corner, the house looked like an immense hall to **Kay** as she first viewed it from the street. The house was built of rough-hewn timber framing. The walls seemed to be made of plain lumber of the kind commonly used for building garages. There was a wide porch, however, with a roof extending over the full length of the side and one story high.

A Chinese girl stepped from the door as **Kay** alighted from the car and followed her into the hallway.

An impression of commonplace disappeared as **Kay** stepped into the house. The floor was polished hardwood, with heavy oriental rugs covering them almost completely.

In the front hallway, was an ornate chandelier which cast a soft light from clusters of small frosted globes.

IMMENSE HOUSE

Heavy oriental curtains covered the hallway down which **Kay** descended the seven steps and noticed that the curtains were hung on tasseled rods.

The room was large and airy, furnished and carpeted, and **Kay** stood in her thin dressing gown. **Kay** stretched out on the bed and a minute later was asleep.

SOUND OF RAIN

She heard the sound of rain just starting as she dropped off. **Melody** awakened her an hour later and asked if she wanted to go back to consciousness; she noticed that it was raining very hard. **Gasoline Alley**

Melody had unpacked **Kay's** bag, and carried her dressing gown into the room.

While the girl was bathing, **Melody** took away her discarded garments, and **Kay** remained in her case, waiting to take a nap.

The house was dark after the lightning and thunder, and **Kay** lay in her thin dressing gown. **Kay** stretched out on the bed and a minute later was asleep.

"I don't think you were able to get my suit in such good condition," said **Kay**.

"That's my job, Miss Allison," said **Melody**. "I'll make you an informal. I'll make you look like Miss **Mae West**."

"Yes, **Mae West**," **Kay** responded.

"I don't know what I am going to do about clothes. I have to go to the store to buy some more," said **Mary Flynn**.

"You can see for yourself how few I brought along," said **Melody**.

"I think you are right, **Melody**, and **Mary Flynn** has clothes full of holes and ants very restricted," said **Kay**.

"That's all I can say. **Mary Flynn** does every day. She is an excellent seamstress."

"**Mary Flynn** does well. We work with them often at home."

A sudden pang of jealousy struck **Melody** as she thought of the many times **Mary Flynn** had ridden with **Jetta** far off into the mountains.

Her suspicion, then, was that **Jetta** must have had reward when the two partners left **Mary Flynn** and **Kay** to ride to the mountains.

There was something about ex-

Curious World

—By William Ferguson

JUST TWO DAYS AGO, THE FAMOUS FLYER, **BLERIOT**, MADE A RECORD EXPOSITION CIRCUIT IN A RACING COUPLE AT A SPEED OF ONE SEVEN MILES PER HOUR.

BLERIOT IS THE FAMOUS FLYER.

GOES ON TO THE WORLD'S FAIR.

TOMATOES WERE NOT EATEN BY CIVILIZED PEOPLES UNTIL AFTER THE DISCOVERY OF CALIFORNIA.
